

I am a truck driver and XM Radio is the only way for me to get the weather and road reports in some cities for me to get around. I feel this is the best way for me to get good info and not like a radio station in town does not give up to date reports on the road in the cities. I hope you will not let this go away, and let us Drivers and other people get the great news and road reports to us. It really makes a big difference to all truck and car drivers. So please keep XM-Radio traffic and weather going. It's very important to me and all of us drivers out there..

If a radio station would do their job and get the weather and traffic out right to us then it would help.. But they do not get the info right at all, gets me in a jam very time but XM does not get me around the jam very time..  
SO PLEASE KEEP THE XM RADIO GOING FOR US TRUCK DRIVERS..

Thanks John.W.
